- Addressing each query raised by SARS with regards to proving your non-residency. Per query **R 1,500**

The requirement to formally register non-residency has arisen out of SARS' taking responsibility for areas previously handled by SARB and Foreign Exchange dealers. SARS may have had a lax attitude to this in the past but this is no longer the case. We would also encourage clients to not believe the idea that they can ignore this legislation without potentially compromising circumstances down the line or worse the reluctance of a local tax practitioner to service your local tax submission needs. The legal requirement for practitioners to adhere to the letter law has become absolute and failure to do so can lead to severe sanctions for the practitioner. This makes adherence a matter of professional integrity. Practitioners cannot legitimately submit a non-resident tax in good conscience or conform to legal requirements without this process having been completed. Harvard House is a quality organization with experienced, qualified professionals addressing your needs. This necessitates a fee commensurate with the complexity and experience required to complete this process.

Please feel free to contact our non-resident department to set up an initial consultation either in person, or via an online meeting. We look forward to working with you.
